

Home Entertainment Is Just the Beginning...

*Adagio*TM

 **CRESTRON**[®]

Adagio®

Listening to Music and Enjoying Movies should be this Easy.

Creston Total Home Technology, the premier brand of custom home automation, introduces its signature series of home entertainment systems. Adagio™.

Experience movies like never before – select any HD source and enjoy the breathtaking clarity of perfectly scaled, professional-quality video, and be enveloped in perfectly balanced state-of-the-art surround sound.

Adagio allows you to enjoy your music your way. Imagine all your family's music – CDs, MP3s, satellite radio – everything brought together in a single system and accessible from anywhere in your home.

Home entertainment should be this easy. With Adagio, it is.
Music and movies are just the beginning.

Scan and select music from the front panel of Adagio, keypads, LCD controllers or touchpanels

From Simple to Sophisticated

From simple to sophisticated, Adagio starts as a complete, integrated home entertainment system, but offers the expandability and connectivity of Crestron Total Home Technology.

Adagio brings all your audio and video into one simple system that can grow with your family.

Adagio is the only home entertainment system that offers "Crestron Inside" — the power of connectivity, expansion and growth. Add Crestron touchpanels, lighting and thermostats at any time. Whether as a stand-alone system or a part of a larger custom home solution, Adagio offers simple installation and an enhanced user experience. No other home entertainment system provides the flexibility and expandability of Adagio.

Imagine all your family's music accessible from anywhere in your home

Adagio®

Audio Distribution System

Entertainment System

The Adagio Audio Distribution System delivers a complete, low-cost solution for high-performance multi-room audio distribution.

Right out of the box, the Audio Distribution System provides sophisticated audio signal routing, processing, and amplification for up to 6 rooms, controllable from its LCD-driven front panel and a choice of room controllers. Built-in AM/FM and Satellite radio tuners allow listeners in different rooms to enjoy their own choice of music, news, sports and talk.

More than just an audio distribution system, the AADS can actually grow as part of a complete home automation solution. With both Cresnet and Ethernet connectivity, the AADS allows nearly limitless expansion and customization with Crestron touchpanels, lighting, thermostats and so much more.

Features

- 6 sources
- Out-of-the-box audio distribution for 6 rooms; expandable up to 24
- Built-in 12-channel amplifier; 45W per channel
- Integrated AM/FM and XM Satellite Radio
- Front panel control
- 2-Series Ethernet control system to support Crestron Total Home Technology
- Supports 6 keypads or LCD controllers (packages available)
- International model available
- Plug-and-play support for Adagio Audio Server and iPod Connect

Available Models:

- AADS** Adagio Audio Distribution with dual AM/FM tuners
- AADS-XM** Adagio Audio Distribution with AM/FM and XM tuners

The Adagio Entertainment System provides high-performance multi-room audio distribution with expanded functionality, more inputs and control ports, and enhanced front panel.

The Adagio Entertainment System delivers a complete, cost-effective solution for high-performance multi-room audio distribution. Right out of the box, the AES provides sophisticated audio signal routing, processing, and amplification for up to 6 rooms, with extensive control from an enhanced LCD-driven front panel and a choice of room controllers.

Up to 3 dual radio tuner cards can be installed in the AES to enable combinations of up to 6 AM/FM, XM and Sirius Satellite Radio tuners. The "Group" feature makes it simple to combine multiple rooms or switch into whole-house party mode.

Features

- 10 sources
- Out-of-the-box audio distribution for 6 rooms, expandable up to 24
- Built-in 12-channel amplifier; 45W per channel
- 6 pre-amp outputs; fixed or variable
- Up to 6 independent tuners (AM/FM, XM and Sirius Satellite Radio) via optional tuner cards
- Enhanced front panel control
- 6 room groups
- Expanded 2-Series Ethernet control system to support Crestron Total Home Technology
- Supports 6 keypads or LCD controllers (packages available)
- International model available
- Plug-and-play support for Adagio Audio Server and iPod Connect

Available Models:

- AES** System with dual AM/FM tuners
- AES-XM** System with AM/FM and XM
- AES-SR** System with AM/FM and Sirius

Available Dual Tuner Cards:

- ATC-AMFM2** Dual AM/FM card
- ATC-AMFMXM** AM/FM and XM card
- ATC-AMFMRS** AM/FM and Sirius card

Adagio is the first complete stand-alone solution from Crestron, featuring front panel controls and **out-of-the-box functionality**. **Plug-and-play** support makes adding more rooms and sources easy.

Audio Expander

Audio Server

The Audio Expander is a high-performance audio distribution processor with integrated multi-channel amplifier.

The Adagio Audio Expander is designed to expand any Crestron Adagio system with 6 additional room outputs. Up to three expanders can be cascaded providing up to 24 zones of high-quality distributed audio. Six built-in powered Cresnet ports provide direct connectivity for keypads, Adagio LCD controllers and other Crestron devices.

Features

- 10 source x 6 room audio distribution
- System expansion up to 24 rooms
- Plug-and-play integration with Adagio systems
- Built-in 12-channel amplifier; 45W per channel
- Independent pre-amp controls for each room
- Built-in Cresnet distribution and power supply
- International model available
- Works with any Crestron 2-Series control system

Available Models:

AAE Adagio Audio Expander

As the centerpiece for any home audio system, the Adagio Audio Server provides an easy, powerful way to store and enjoy your complete music collection.

The Adagio Audio Server stores thousands of hours of music, and lets the whole family instantly access any album or track from touchpanels, keypads and computers throughout the home. Browsing artists and titles, loading new CDs, and creating playlists is easy using the simplified onscreen menu. Album information and cover art is downloaded automatically via the Internet from the Gracenote CDDB Music Recognition Service. Multi-room outputs allow listeners in up to four different rooms to each enjoy their own selections, while still more listeners can stream audio on any computer using their favorite media player application.

Features

- Audiophile quality digital audio server
- Up to 4 discrete outputs
- On-screen, web browser and touchpanel music management
- Supports MP3 up to 320k, WMA and uncompressed WAV formats
- Lossless optical and coaxial digital outputs
- Digital and analog inputs
- Supports Windows Media® Player and Apple® iTunes®
- Ethernet and IR controllable
- Plug-and-play integration with Adagio systems

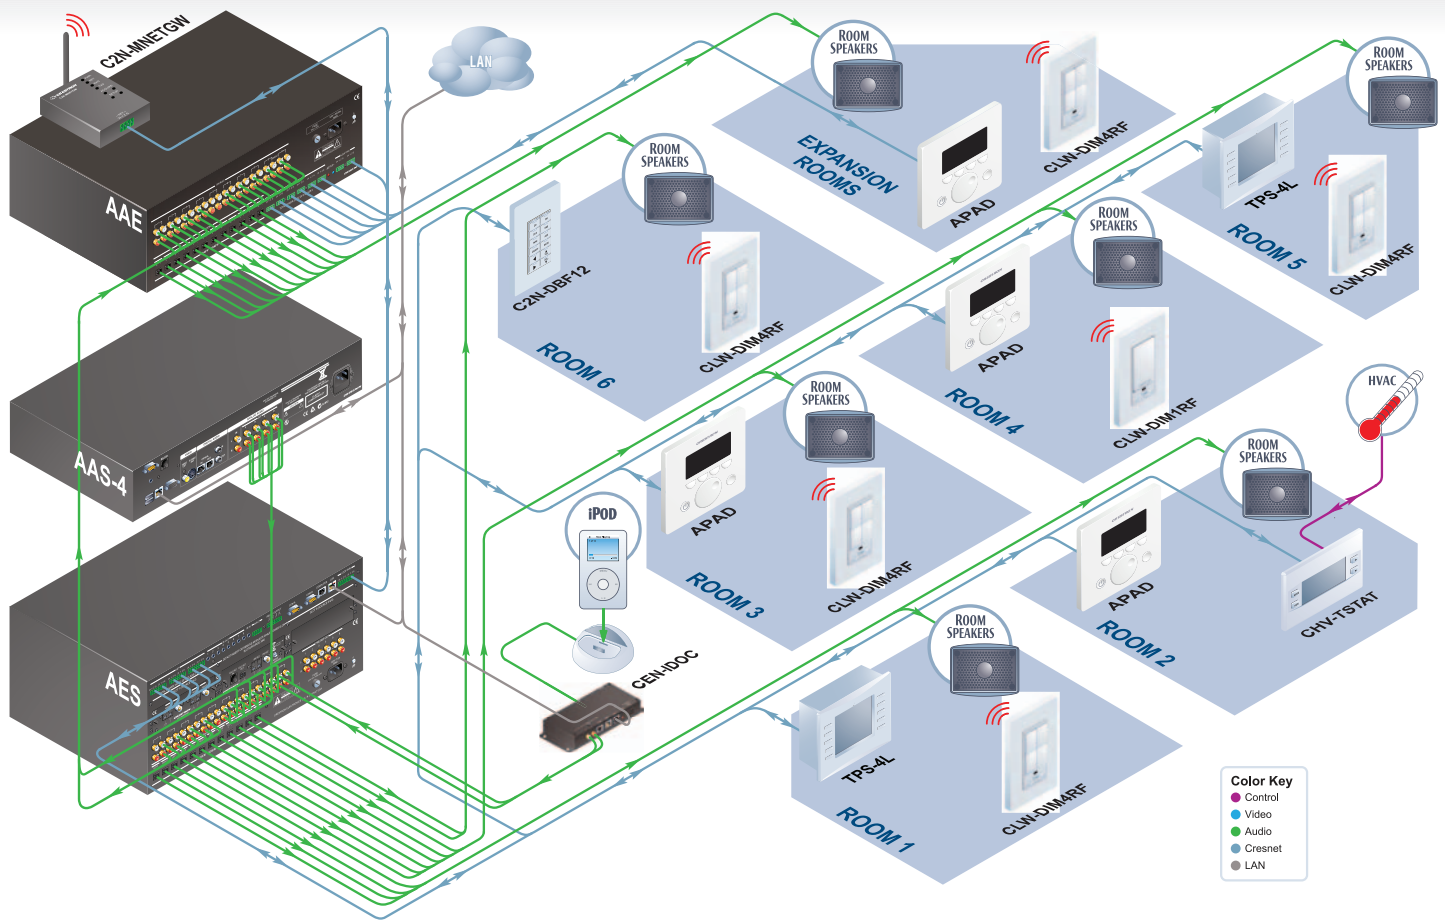

Available Models:

AAS-1 Adagio Audio Server 1 output, 80GB

AAS-2 Adagio Audio Server 2 outputs, 160GB

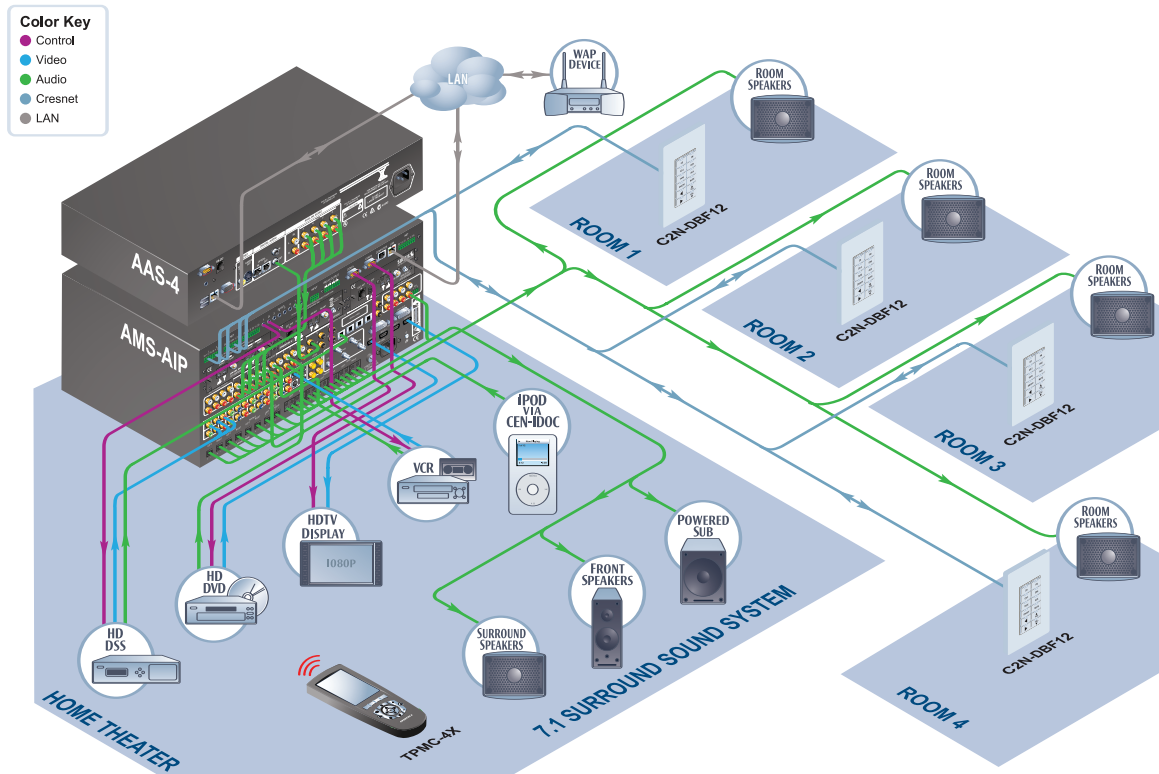

AAS-4 Adagio Audio Server 4 outputs, 250GB

Adagio Audio Distribution

Adagio Home Theater

Adagio combines multi-room audio with **theater-quality surround sound and high-definition video processing** for a truly complete home entertainment system — all in one product!

Media System

Media System AIP

The Adagio Media System delivers a high-performance surround sound and multi-room audio distribution solution in one elegant yet cost-effective package.

State-of-the-art surround sound processing and a powerful 7-channel amplifier deliver jaw-dropping sonic performance. Clever signal steering and advanced Audyssey MultEQ® signal processing realize the full potential of the home theater speaker system for any type of listening experience. An abundant array of HDMI and analog AV inputs handles a full complement of high-end home theater and audio sources with ease. Audio distribution is even built in to support up to 6 additional rooms.

Features

- Dolby Digital EX and DTS-ES 96/24 decoding
- 7x100 watt surround sound amplifier
- Audyssey MultEQ advanced automatic equalization and delay
- High-definition analog and HDMI digital video switching
- Audio distribution for 4 to 6 rooms, expandable up to 24
- Optional handheld WiFi wireless touchpanel
- Choice of room keypads or APAD LCD controllers
- Accepts up to 3 dual tuner cards for AM/FM, XM and SIRIUS
- Plug-and-play support for AAS and iPod
- Set up via front panel, wireless touchpanel, or software
- 2-Series Ethernet control system for full home automation

Available Models:

- AMS Media System with dual AM/FM tuner
- AMS-SR Media System with AM/FM and SIRIUS
- AMS-XM Media System with AM/FM and XM

The Adagio Media System AIP maximizes your home theater viewing experience with Advance Image Processing.

All of the features of the standard Adagio Media System, plus high-definition digital video processing to optimize the performance of a complete HD system. Whether viewing high-def HDMI/HDCP or standard television, every input is scaled to match the flat panel or projection display perfectly. Utilizing Gennum Visual Excellence Processing™ with TruMotionHD™ fully adaptive deinterlacing, both SDTV and HDTV sources are displayed with exceptional image sharpness and detail for astounding realism.

Features

- All of the surround sound and multi-room features of the Adagio Media System
- High-definition analog and HDMI/DVI digital video switching
- Accepts inputs from standard television, HDTV, and UXGA computer graphics
- Connectivity for component, HDMI, DVI, or RGB displays
- Supports a vast selection of displays with resolutions up to 1080p
- Advanced 10-bit image processing — performs cutting-edge scaling and image enhancement
- Customizable onscreen graphics
- Versatile PIP and PBP video windowing

Available Models:

- AMS-AIP Media System w/Advanced Image Processing and dual AM/FM tuner
- AMS-AIP-SR Media System w/Advanced Image Processing, AM/FM and SIRIUS
- AMS-AIP-XM Media System w/Advanced Image Processing, AM/FM and XM

Adagio®

Interface for Apple iPod®

The Crestron iPod interface provides full iPod functionality through an audio distribution system, allowing family members to do everything that they can do from their iPod from any room in the house.

Using Crestron's interface for Apple iPod, Adagio automatically recognizes the iPod as a source. Immediately scan and select music on an iPod right from the front panel of the Adagio or remotely using Crestron keypads, LCD panels or even touchpanels. With a Crestron touchpanel the iPod experience can be replicated in any room. The Crestron Apple iPod interface is compatible with all current models including nano and iPod video.

Features

- Stylish iPod docking station
- Connects via compact interface module (included)
- International model available
- Support iPod, iPod mini, iPod nano, iPod photo and iPod video
- Plug-and-play integration with Adagio systems

Available Models:

CEN-IDOC Interface for Apple iPod®

Wall Mount LCD Controller

The Adagio Wall Controller provides full control of the audio distribution system, and real-time dynamic feedback display of all audio sources.

Adagio plug-and-play functionality also extends to room control. Simply connect the LCD controllers for instant room control. The Adagio LCD room controller displays song, album and artist information. The simple NavWheel interface scrolls and selects sources, tracks, channels, volume and more. The Adagio LCD controller provides an enhanced user experience in any room. Adagio packages that include six LCD controllers are available.

Features

- Stylish, affordable wall mount controller
- Alluring LCD graphic display
- Cresnet communications; 2-Series compatible
- 4 softkey pushbuttons
- Simple NavWheel control
- Adagio plug-and-play functionality
- Adagio 6 PAK available

Available Models:

APAD-W Adagio Wall Mount LCD Controller in White

APAD-B Adagio Wall Mount LCD Controller in Black

Packaged solutions offer enhanced control from any room.
Scan and select music on an iPod from the Adagio front panel, or remotely using Crestron keypads, LCD panels or touchpanels.

Decorator Keypads

Adagio also provides plug-and-play support with Crestron's traditional 12-button keypads for more basic room control.

Crestron keypads are a decorative, cost-effective solution for full-function room control. Crestron keypads feature removable, engravable buttons that allow easy replacement and custom labeling for audio source selection, volume control and more. Keypads are available in black, white or almond to match any décor. Adagio packages are available that include six 12-button keypads.

Features

- Includes assortment of 30 labeled buttons
- Most cost-effective room control solution
- Available in black, white or almond
- Adagio 6 PAK available

Available Models:

C2N-DBF12A 12-Button Decorator Function Keypad in Almond
 C2N-DBF12B 12-Button Decorator Function Keypad in Black
 C2N-DBF12W 12-Button Decorator Function Keypad in White

3.6" Wall Mount Touchpanel

The TPS-4L delivers the power and flexibility of a custom designed Crestron touchpanel interface in a discreet flush mount display.

The Isys® TPS-4L delivers amazing touchpanel performance at an incredibly low cost. In the space of a common light switch, the TPS-4L packs a bright, high-contrast 3.6" active matrix color touchscreen with astonishing 16-bit Isys color graphics and 10 translucent white backlit pushbuttons. Two-way high-speed Ethernet supports dynamic display of radio stations, song titles, and album cover art. Customized WAV files can even be loaded to add personalized sounds and voice prompts.

Features

- 3.6" active matrix color touchscreen display
- 16-bit Isys graphics 320 x 240 resolution
- Synapse Image Rendering Algorithm
- WAV file audio feedback
- 10 white backlit pushbuttons and engravable faceplate
- Built-in Ethernet and Cresnet communications
- Stylish flush wall mount design

Available Models:

TPS-4LA Isys® 3.6" Wall Mount Touchpanel in Almond
 TPS-4LB Isys® 3.6" Wall Mount Touchpanel in Black
 TPS-4LW Isys® 3.6" Wall Mount Touchpanel in White

Adagio®

Adagio brings all your entertainment media together into one simple system and delivers it wherever you are – anywhere in the house.

Adagio provides basic out-of-the-box functionality and plug-and-play support for additional zones, room controllers and sources such as satellite radio, the Adagio Audio Server and the Crestron interface for Apple iPod®. Enhanced features and custom configurations provided by your local Crestron installer.

And entertainment is just the beginning. Adagio features “Crestron Inside” for seamless integration with Crestron Total Home Technology solutions. Add Crestron touchpanels, lighting and thermostats at any time. No other audio distribution system offers the power, flexibility and expandability of Adagio.

Ask your Crestron provider about Adagio packages and custom solutions.

Enjoy your music and movies your way with Adagio.
